

Visa / Mastercard

Which company performs
better financially?

BY ELIA DUKAN AND DAVID SFEDJ

1. Same Industry, Different Financial Profile

Visa

Scale + cleaner balance sheet

Mastercard

Efficiency + thinner equity base

Same business model: global payment networks, not banks

The comparison is really about margins, leverage and asset use

Revenue
\$39.1bn

Net income
\$19.6bn

Revenue
\$32.0bn

Net income
\$14.6bn

Visual cue
Visa
bigger scale

One sentence to say out loud: Visa is larger and safer; Mastercard is leaner and more aggressive.

2. Profitability And Risk

Net margin

Debt / assets

Interest coverage

Winner
Visa

better margin quality

Risk
Visa

safer leverage profile

LT debt / equity

ROE

Key point: Mastercard's very high ROE looks impressive, but it is boosted by a much smaller equity base.

3. Asset Structure

Net PP&E

Biggest gap
Visa

much heavier intangible base

Read carefully
Mastercard

less debt in dollars, more risky
vs equity

Goodwill + intangibles

14.94bn

Total LT debt

This slide explains why turnover ratios must be
interpreted with the asset mix in mind.

4. Efficiency

ROA

Asset turnover

Fixed asset turnover

Receivables turnover

Efficiency

Mastercard

wins 3 of 4

Collection

Visa

faster receivables turn

Inventory turnover is not meaningful here because both companies are service payment networks.

5. Market View And Final Judgment

P/E

Price / book

Dividend payout

Overall winner

Visa

better financial quality

Operational edge

Mastercard

better asset efficiency

Visa wins on
margin, leverage,
payout

Mastercard wins on
ROA and turnover

Final call: Mastercard is more efficient operationally, but Visa performs better financially overall.
